WHAT IS A BRAINVENTURE?

Parents, you don't need to wade through piles of websites to find something educationally meaningful for your child to do at home. Visit the BrainVentures website! BrainVentures are crafted and vetted by classroom teachers specifically for the current situation – closed schools and learning online at home.

Starting with a driving question – How can giraffes drink with that long neck? Why is St Patrick's Day called St. Patrick – BrainVentures take a child on a visually guided, scaffolded, **learning adventure**. BrainVentures give a child choices of learning activities, engage a child in constructing animations, videos, photo albums, stories and in exploring simulations. From music to math, from science to the arts, BrainVentures light a child's imagination and increase the child's understanding of the world. BrainVentures are fun – providing educational opportunities outside of school – and **they are free!**
