# BRAIN VENTURES FOR K-12

CENTER FOR  
DIGITAL CURRICULA  
UNIVERSITY OF MICHIGAN

## WHAT IS A BRAINVENTURE?

Starting with a driving question – How do gorillas live in the jungle? Why is St Patrick’s Day called St. Patrick – BrainVentures take a child on a visually guided, scaffolded, **learning adventure**. BrainVentures give a child choices of learning activities, engage a child in constructing animations, videos, photo albums, stories and in exploring simulations. From music to math, from science to the arts, BrainVentures light a child’s imagination and increase the child’s understanding of the world. BrainVentures are fun – providing educational opportunities outside of school – and free!

## TEACHERS – HERE’S THE EASY TO USE ANSWER FOR AT HOME LEARNING ADVENTURES

BrainVentures are crafted by classroom teachers specifically for the current situation – closed schools, learning online at home & still providing essential learning. No need to wade through the thousands of offerings; our “BrainVenture-a-Day” Program saves you time by delivering a vetted, high-quality **instructional resource** to your email InBox. Just distribute the BrainVenture, via Google Classroom, email, Schoology, etc – to your students – and watch them learn and see their parents smile.
